RE: Site Inspection, SM/047/028, Cedar Buttes #1

On April 4, 1988, I inspected the above referenced tar sands operation. The site is accessed by a private road located 1.3 miles east of the access to the Ashley National Forest and White Rock Canyon.

The site appears to have been inactive for at least several months. The only noticeable change since the last inspection in February 1987 was that the stockpile was smaller.
